DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4, 6-16, 20-24, 26-29, 33-53, 55-57 and 60-67 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-4, 6-16, 20-24, 26-29, 33-53, 55-57 and 60-67 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-34 of copending Application No. 09/792,057 (Hurtta) in view of Shenyblat et al (Shenyblat), U.S. Patent No. 6,677,894.

This is a provisional obviousness-type double patenting rejection.

Regarding claims 1-4, 6-16, 20-24, 26-29, 33-53, 55-57 and 60-67, Hurtta discloses sending a first request to setup a communication channel from a user equipment to a first network element, wherein the request has an indication that the communication channel will be used for transferring a call, receiving the first request in a first network element and selecting a second network element in accordance with said indication, wherein traffic on the channel is filtered according to filtering information (see claims 1-6, 25-28 and 32-34).

Hurtta, however, fails to disclose wherein the indication indicates the call requires location-based services.

In a similar field of endeavor, Shenyblat discloses a method for providing location-based information via a computer network. Shenyblat further discloses wherein a call request (i.e., 911 call) indicates that the call requires location-based services (in order to locate the mobile device).

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Hurtta with the teachings of Shenyblat for the purpose of quickly locating a mobile device.
